Education

Vishwakarma Institute of Technology

Bachelor of Technology in Computer Engineering

Sep. 2023 – June 2026

Pune, India

Government Polytechnic, Pune

Diploma in Computer Engineering

August 2020 – June 2023

Pune, India

Experience

Globeminds Technologies Pvt. Ltd

Software Development Summer Intern

July 2022 – Oct. 2022

Pune, India

- Developed and maintained web applications, contributing to front-end and back-end development with improved user interface and experience.
- Implemented a logging feature to analyze system log dumps using Java streams, fostering efficient bug identification and resolution.
- Actively participated in agile development practices, including daily stand-ups and code reviews, encouraging a collaborative team culture.

Projects

WordCraft: Visuals from Verbs | Python, PyTorch, HuggingFace Hub, Tensorboard

May 2024

- Developed a custom AI model, EfficientCLIP-GAN, capable of generating images from text descriptions with a significant performance improvement of 100x faster than existing models.
- Leveraged advanced deep learning techniques and GAN architectures, showcasing expertise in state-of-the-art AI methods.

Mistral Talk | Python, Transformers, PEFT, LORA

November 2023

- Created an AI-driven Hinglish chat application, finetuned for Hinglish conversations, enabling smooth and natural dialogue for a significant user base in multilingual communities.
- Integrated Hinglish language support, enhancing the AI's understanding and response accuracy.

SmartLib | Java, Eclipse, Java Swing

June 2023

- Developed a comprehensive library management system SmartLib, a Java-based desktop application designed to help librarians efficiently manage library operations.
- Designed a clean and intuitive user interface with enhanced operational efficiency by integrating features to track book inventory, manage checkouts, and handle returns, optimizing day-to-day library management.

Village Governance System | Java, SQL, MySQL

December 2022

- Improved government efficiency in managing village operations with a comprehensive system, implemented in two parts: database and application.
- Efficiently managed village data, including demographics, education, farmer records, forest data, and infrastructure. Based on six constitutional pillars, ensuring robust governance.

Technical Skills

Languages: Java, JavaScript, Python, C++, C, HTML/CSS, SQL

Developer Tools: VS Code, Eclipse, Android Studio, MySQL, MongoDB, Colab, AzureML, HuggingFace Hub, Unity

Technologies/Frameworks: Spring Boot, MERN, PyTorch, Gradio, Transformers, StableBaseline3, GitHub, Figma, StreamLit

Achievement / Extracurricular

Data Engineering Course: AbInitio expert

Llama3 Hackathon: Best Innovative Product

Shod2k23: Runner-up

IIRS-ISRO Workshop: Applications of ML in Urban Studies
